International Journal for
Numerical Methods in Engineering

Volume 61 Number 1 • 7 September 2004

A variational *r*-adaption and shape-optimization method for finite-deformation elasticity: P. Thoutireddy and M. Ortiz 1

Meshfree point collocation method for elasticity and crack problems: S.-H. Lee and Y.-C. Yoon 22

Finite element modelling of fibre reinforced polymer sandwich panels exposed to heat: P. Krysl, W. T. Ramroth, L. K. Stewart and R. J. Asaro 49

Local modal reduction in explicit dynamics with domain decomposition. Part 2: specific interface treatment when modal subdomains are involved: V. Faucher and A. Combescure 69

A hierarchic 3D finite element for laminated composites: G. Kuhlmann and R. Rolfes 96

Updated semi-discretization method for periodic delay-differential equations with discrete delay: T. Insperger and G. Stépán 117

Numerical analysis of a three-dimensional super-elastic constitutive model: F. Auricchio and U. Stefanelli 142

Erratum to "Perfectly matched layers for transient elastodynamics of unbounded domains": U. Basu and A. K. Chopra 156

Volume 61 Number 2 • 14 September 2004

Application of piece-wise linear weight functions for 2D 8-node quadrilateral element in contact problems: C. Luo and M. Klisinski 159

A finite element formulation to identify damage fields: the equilibrium gap method: D. Claire, F. Hild and S. Roux 189

LayTracks: a new approach to automated geometry adaptive quadrilateral mesh generation using medial axis transform: W. R. Quadros, K. Ramaswami, F. B. Prinz and B. Gurumoorthy 209

Achieving minimum length scale in topology optimization using nodal design variables and projection functions: J. K. Guest, J. H. Prévost and T. Belytschko 238

Computing general companion matrices and stability regions of multirate methods: G. Rodríguez-Gomez, P. González-Casanova and J. Martínez-Carballido 255

Exact static element stiffness matrices of non-symmetric thin-walled curved beams: N.-I. Kim, H.-T. Yun and M.-Y. Kim 274

Fold zone analysis in wiping die bending process by using experimental and numerical approaches: A. Mkaddem and A. Potiron 303

The *International Journal for Numerical Methods in Engineering* is covered by the following abstracting and indexing services:

Applied Mechanics Reviews, BHRA Fluid Engineering Centre (Elsevier), Cambridge Scientific Abstracts/Materials Information, CompuMath Citation Index® (ISI), Current Contents®/Engineering, Computing & Technology (ISI), Earthquake Engineering Abstracts (NISEE), Ei COMPENDEX PLUS, Ei Page One, Geobase (Elsevier), Geotechnical Abstracts (Geotext Services), Indian Society of Earthquake Technology Bulletin, INSPEC, International Aeronautical Abstracts & Database (AIAA), International Civil Engineering Abstracts (Emerald), International Petroleum Abstracts, ISI Alerting Services, Materials Science Citation Index (ISI), Mathematical Reviews, Mechanics, PASCAL Database (INIST), Science Citation Index Expanded (also known as SciSearch®) (ISI), Science Citation Index® (ISI), Shock & Vibration Digest (Sage), Tribology and Corrosion Abstracts, Zentralblatt für Mathematik/Mathematics Abstracts.

IJNMBH 61 1–2738 (2004) • ISSN 0029-5981

Volume 61 Number 3 • 21 September 2004

Mapped infinite elements for three-dimensional multi-region boundary element analysis: W. Moser, Ch. Duenser and G. Beer 317

Fatigue life prediction using 2-scale temporal asymptotic homogenization: C. Oskay and J. Fish 329

Accurate stresses in the thin-layer method: E. Kausel 360

Second-order accurate constraint formulation for subdivision finite element simulation of thin shells: S. Green and G. Turkiyyah 380

On analysis of the elasto-viscoplastic response of single crystals with anisotropic damage: constitutive modelling and computational aspects: F. Lu, Z. Guang, Z. Ke-shi, J. Q. Xu and Y. Hai-dong 406

Finite element formulations of strain gradient theory for microstructures and the C^{0-1} patch test: A.-K. Soh and C. Wanji 433

Comparison of matrix-free acceleration techniques in compressible Navier-Stokes calculations: N. P. C. Marques and J. C. F. Pereira 455

Volume 61 Number 4 • 28 September 2004

Applications of numerical eigenfunctions in the fractal-like finite element method: D. K. L. Tsang, S. O. Oyadiji and A. Y. T. Leung 475

Improvement of the asymptotic behaviour of the Euler-Maclaurin formula for Cauchy principal value and Hadamard finite-part integrals: U. J. Choi, S. W. Kim and B. I. Yun 496

Non-linear finite element analysis of large amplitude sloshing flow in two-dimensional tank: J. R. Cho and H. W. Lee 514

Error estimation for geometrically non-linear analysis of framed structures: B. A. Izzuddin, A. Chew and D. Lloyd Smith 532

Accurate numerical simulation of radiative heat transfer with application to crystal growth: A. Ern and J.-L. Guermond 559

A C^1 finite element for flexural and torsional analysis of rectangular piezoelectric laminated/sandwich composite beams: M. Ganapathi, B. P. Patel and M. Touratier 584

Volumetric locking in natural neighbour Galerkin methods: D. González, E. Cueto and M. Doblaré ... 611

Volume 61 Number 5 • 7 October 2004

A fast algorithm for three-dimensional electrostatics analysis: fast Fourier transform on multipoles (FFTM): E. T. Ong, K. H. Lee and K. M. Lim 633

A direct stiffness analysis of a composite beam with partial interaction: G. Ranzi, M. A. Bradford and B. Uy 657

A universal method for structural static reanalysis of topological modifications: S. H. Chen and Z. J. Yang 673

Shape optimization for radar cross sections by a gradient method: A. Bondeson, Y. Yang and P. Weinerfelt 687

A three-dimensional model describing stress-temperature induced solid phase transformations: thermomechanical coupling and hybrid composite applications: F. Auricchio and L. Petrini 716

Wind field simulation for structural engineering purposes: R. Rossi, M. Lazzari and R. V. Vitaliani..... 738

A family of lower- and higher-order transversal linearization techniques in non-linear stochastic engineering dynamics: D. Roy 764

Volume 61 Number 6 • 14 October 2004

On optimization of bio-probes: N. L. Pedersen..... 791

A three-dimensional model describing stress-temperature induced solid phase transformations: solution algorithm and boundary value problems: F. Auricchio and L. Petrini..... 807

Reduced modified quadratures for quadratic membrane finite elements: C. S. Long and A. A. Groenwold..... 837

Numerical comparison of some explicit time integration schemes used in DEM, FEM/DEM and molecular dynamics: E. Rougier, A. Munjiza and N. W. M. John..... 856

On general isotropic tensor functions of one tensor: E. A. de Souza Neto..... 880

A three-dimensional computational procedure for reproducing meshless methods and the finite element method: P. Schembri, D. L. Crane and J. N. Reddy..... 896

Fixed mesh front-tracking methodology for finite element simulations: P. Zhao, J. C. Heinrich and D. R. Poirier..... 928

Volume 61 Number 7 • 21 October 2004

Multidisciplinary topology optimization solved as a Nash game: A. Habbal, J. Petersson and M. Thellner 949

The particle finite element method: a powerful tool to solve incompressible flows with free-surfaces and breaking waves: S. R. Idelsohn, E. Oñate and F. Del Pin..... 964

The fractal finite element method for unbounded problems: A. Y. T. Leung, H. Dai, S. L. Fok and R. K. L. Su..... 990

Homogenization of sandwich structures: T. Rabczuk, J. Y. Kim, E. Samaniego and T. Belytschko 1009

Modelling heat transfer in two-fluid interfacial flows: V. Mehdi-Nejad, J. Mostaghimi and S. Chandra. 1028

A modified finite difference sensitivity analysis method allowing remeshing in large strain path-dependent problems: P. A. Muñoz-Rojas, J. S. O. Fonseca and G. J. Creus 1049

The perfectly matched layer for the ultra weak variational formulation of the 3D Helmholtz equation: T. Huttunen, J. P. Kaipio and P. Monk 1072

A Galerkin formulation for shear deformable plate bending dynamics: J. J. Pérez-Gavilán and M. H. Aliabadi..... 1093

Algorithms for the analysis of 3D finite strain contact problems: P. M. A. Areias, J. M. A. César de Sá and C. A. Conceição António..... 1107

Volume 61 Number 8 • 28 October 2004

Shape functions for polygonal domains with interior nodes: E. A. Malsch and G. Dasgupta 1153

A distributed memory parallel implementation of the multigrid method for solving three-dimensional implicit solid mechanics problems: A. Namazifard and I. D. Parsons 1173

Compression of time-generated matrices in two-dimensional time-domain elastodynamic BEM analysis: D. Soares, Jr. and W. J. Mansur 1209

Numerical solution of second-order, two-point boundary value problems using continuous genetic algorithms: Z. S. Abo-Hammour, M. Yusuf, N. M. Mirza, S. M. Mirza, M. Arif and J. Khurshid 1219

The generalized global basis (GGB) method: H. Waisman, J. Fish, R. S. Tuminaro and J. Shadid 1243

Global optimization of minimum weight truss topology problems with stress, displacement, and local buckling constraints using branch-and-bound 1270

Analytic preconditioners for the electric field integral equation: X. Antoine, A. Bendali and M. Darbas . 1310

A super-element for crack analysis in the time domain: C. Song 1332

Volume 61 Number 9 • 7 November 2004

Energy conserving and dissipative time finite element schemes for *N*-body stiff problems: Q. V. Bui ... 1359

Modified Newmark family for non-linear dynamic analysis: Q. V. Bui 1390

On the stable finite element procedures for dynamic problems of saturated porous media: M. Huang, Z. Q. Yue, L. G. Tham and O. C. Zienkiewicz 1421

Hybrid-stress six-node prismatic elements: K. Y. Sze, X. H. Liu and S. H. Lo 1451

Constrained boundary recovery for three dimensional Delaunay triangulations: Q. Du and D. Wang . 1471

Gate elements at injection locations in numerical simulations of flow through porous media: applications to mold filling: P. Simacek and S. G. Advani 1501

Articulated mechanism design with a degree of freedom constraint: A. Kawamoto, M. P. Bendsøe and O. Sigmund 1520

Linear eigenvalue analysis of the disc-brake squeal problem: Q. Cao, H. Ouyang, M. I. Friswell and J. E. Mottershead 1546

Volume 61 Number 10 • 14 November 2004

Loosely woven fabric model with viscoelastic crimped fibres for ballistic impact simulations: I. Ivanov and A. Tabiei 1565

Optimization of support positions to maximize the fundamental frequency of structures: D. Wang, J. S. Jiang and W. H. Zhang 1584

Four-node incompatible plane and axisymmetric elements with quadratic completeness in the physical space: Y. Q. Huang and Q. S. Li 1603

Adaptivity for finite volume on unstructured triangular meshes: a study of thermal injury in teeth: M. A. Martins, L. S. Oliveira and R. M. Valle 1625

On application of two superconvergent recovery procedures to plate problems: B. Boroomand, M. Ghaffarian and O. C. Zienkiewicz 1644

Spatial chaos of 3-D elastica with the Kirchhoff gyrostat analogy using Melnikov integrals: A. Y. T. Leung and J. L. Kuang 1674

On using linear elements in incompressible plane strain problems: a simple edge based approach for triangles: B. Boroomand and B. Khalilian 1710

A method for multiple crack growth in brittle materials without remeshing: E. Budyn, G. Zi, N. Moës and T. Belytschko 1741

Volume 61 Number 11 • 21 November 2004

Two simple and efficient displacement-based quadrilateral elements for the analysis of composite laminated plates: Y. X. Zhang and K. S. Kim 1771

An efficient method for decomposition of regular structures using graph products: A. Kaveh and H. Rahami 1797

Fast and accurate 4-node quadrilateral: M. Fredriksson and N. S. Ottosen 1809

A posteriori finite element bounds to linear functional outputs of the three-dimensional Navier-Stokes equations: Z. Cheng and M. Paraschivoiu 1835

Validation of the *a posteriori* error estimator based on polynomial preserving recovery for linear elements: Z. Zhang and A. Naga 1860

Bounds for element size in a variable stiffness cohesive finite element model: V. Tomar, J. Zhai and M. Zhou 1894

Distributed parameter thermal system control and observation by Green-Galerkin methods: M. Alaeddine and C. C. Doumanidis 1921

Higher-order extensions of a discontinuous Galerkin method for mid-frequency Helmholtz problems: C. Farhat, R. Tezaur and P. Weidemann-Goiran 1938

A spectral stochastic element free Galerkin method for the problems with random material parameter: H. M. Kim and J. Inoue 1957

Erratum to "A spectral-element method for modelling cavitation in transient fluid-structure interaction": M. A. Sprague and T. L. Geers 1976

Volume 61 Number 12 • 28 November 2004

A general advancing front technique for filling space with arbitrary objects: R. Löhner and E. Oñate ... 1977

A generalized dimension-reduction method for multidimensional integration in stochastic mechanics: H. Xu and S. Rahman 1992

A parallel Galerkin boundary element method for surface radiation and mixed heat transfer calculations in complex 3-D geometries: X. Cui and B. Q. Li 2020

Conforming polygonal finite elements: N. Sukumar and A. Tabarraei 2045

Anisotropic elastic-plastic analysis of shells at large strains. A comparison of multiplicative and additive approaches to enhanced finite element design and constitutive modelling: C. Miehe and N. Apel 2067

Supersensitivity due to uncertain boundary conditions: D. Xiu and G. E. Karniadakis 2114

Application of *h*-adaptive FEM and Zarka's approach to analysis of shakedown problems: W. Cecot 2139

Construction of polygonal interpolants: a maximum entropy approach: N. Sukumar 2159

Volume 61 Number 13 • 7 December 2004

A FETI-based multi-time-step coupling method for Newmark schemes in structural dynamics: A. Prakash and K. D. Hjelmstad 2183

Constitutive model for quasi-static deformation of metallic sandwich cores: Z. Xue and J. W. Hutchinson 2205

Volume determination for bulk materials in bunkers: S. A. Ahmed, R. Buckingham, P. A. Gremaud, C. D. Hauck, C. M. Kuster, M. Prodanovic, T. A. Royal and V. Silantyev 2239

Hybrid particle methods in frictionless impact-contact problems: H. Huang, C. T. Dyka and S. Saigal . 2250

A stabilized one-point integrated quadrilateral Reissner-Mindlin plate element: F. Gruttmann and W. Wagner 2273

Parallel global optimization with the particle swarm algorithm: J. F. Schutte, J. A. Reinbolt, B. J. Fregly, R. T. Haftka and A. D. George 2296

Cracking particles: a simplified meshfree method for arbitrary evolving cracks: T. Rabczuk and T. Belytschko 2316

Sounding of finite solid bodies by way of topological derivative: M. Bonnet and B. B. Guzina 2344

Continuous design transmutation method for problems in engineering analysis: Z. Mu and K. Kazerounian 2374

Volume 61 Number 14 • 14 December 2004

Behaviour control of modern composite structures: A. Tesar and M. Sedlar 2389

Common-refinement-based data transfer between non-matching meshes in multiphysics simulations: X. Jiao and M. T. Heath 2402

Optimal design and optimal control of structures undergoing finite rotations and elastic deformations: A. Ibrahimbegovic, C. Knopf-Lenoir, A. Kučerová and P. Villon 2428

Treatment of material discontinuity in two meshless local Petrov-Galerkin (MLPG) formulations of axisymmetric transient heat conduction: R. C. Batra, M. Porfiri and D. Spinello 2461

An interval finite element approach for the calculation of envelope frequency response functions: D. Moens and D. Vandepitte 2480

On strategies for enforcing interfacial constraints and evaluating jump conditions with the extended finite element method: H. Ji and J. E. Dolbow 2508

Highly convergent dynamic models obtained by modal synthesis with application to short wave pulse propagation: R. Barauskas and R. Barauskiene 2536

Design of frames using genetic algorithm, force method and graph theory: A. Kaveh and A. Abdietehrani 2555

New two-dimensional slope limiters for discontinuous Galerkin methods on arbitrary meshes: H. Hoteit, Ph. Ackerer, R. Mosé, J. Erhel and B. Philippe 2566

Volume 61 Number 15 • 21 December 2004

Arbitrary discontinuities in space-time finite elements by level sets and X-FEM: J. Chessa and T. Belytschko 2595

Symmetry preserving algorithm for large displacement frictionless contact by the pre-discretization penalty method: D. Gabriel, J. Plešek and M. Ulbin 2615

A rational approach to mass matrix diagonalization in two-dimensional elastodynamics: E. A. Paraskevopoulos and D. Talaslidis 2639

A changing range genetic algorithm: A. Amirjanov 2660

A universal measure of the conformity of a mesh with respect to an anisotropic metric field: P. Labbé, J. Dompierre, M.-G. Vallet, F. Guibault and J.-Y. Trépanier 2675

A *P*-version, first-order shear deformation, finite element for geometrically non-linear vibration of curved beams: P. Ribeiro 2696

A finite element formulation of the outlet gradient boundary condition for convective-diffusive transport problems: F. Cornaton, P. Perrochet and H.-J. Diersch 2716
